

Keeping your passwords safe!

DIFFERENT PASSWORDS

Refrain from using the same password for other websites or services since a data breach will compromise multiple accounts!

STRONG PASSWORDS

Make sure to create complex passwords that are at least 12 characters long, contain upper-case and lower-case letters, numbers and special characters!

HARD TO GUESS

Do not use passwords that could be easily guessed by people who know you, such as your name, date of birth and names of pets!

TAKING CARE OF THEM

Do not write your passwords on sticky notes or on mobile devices. Passwords should not be saved when browsing on a public or shared computers!
