DEFINITION

IMI System = Internal Market Information System .The IMI system is a mandatory tool for exchange of information between the national authorities in charge of the internal market. The system has been developed by the European Commission in collaboration with Member States with a view to implementing administrative cooperation and mutual assistance in compliance with Regulation 1024/2012/EU. Since the GDPR came into force in 2018 it has been used by Data Protection Authorities to comply with Art 60(12) of the Regulation.

Footnotes

(1) Any case is considered as closed once the related decision has been served and it has not been appealed. In the event of any appeal from the decision the case will be considered as closed once the appeal process becomes final and conclusive.
